Welcome note

Dear Student,

By signing up for further study, you have chosen a wise course of action that is vital to your future.

I would like to thank you very much for considering choosing McWilliams Academy as your partner and facilitator in this important event that will undoubtedly change your life forever.

You may find this first step insignificant at the moment. But in time, you'll appreciate the immense consequences of a good decision that will have an impact on both your own life as well as your family and society.

When you first immerse yourself in the content of your study course, you may experience a degree of uncertainty and self-doubt. I assure you, this experience will be quite normal for an inexperienced student.

You'll soon learn how the teaching material has been carefully designed to help you progress gradually and logically, culminating in a complete understanding of the topic by applying discipline and concentrating on it during practice.

Before attempting to explore the content of a topic, it is recommended that you study this brochure in its entirety from cover to cover. Refer to the Study Guide regularly, which when properly used will effectively serve its intended purpose of guiding studies. Develop and put in place a routine that fits your situation, which is to be followed at all times.

Our website is here: <https://www.mcwilliamsacademy.net/studentportal>

The practice is undoubtedly the most efficient way to regulate your study schedule. Don't try to cover too much study material in one session, because you won't be able to comprehend and correctly reproduce it.

I'm sure you're going to have to repeat this process, which is counterproductive and a waste of time. Once you get used to studying regularly, your ability to work at an increasing rate will be improved.

Although your study modules are intended to prepare you for completion of the course, further reading material is useful in improving your understanding of this topic. Browse through the course content module will be studied in-depth later. Before you begin to focus on detail, you must see this course for a brief time.

When studying, always follow a realistic timetable that gives you enough time to deal with your relationship commitments and rest. Ensure that you're effectively balancing and managing your duties in the right way. Use the helpful study tips in this guide to take full advantage of any doubts you may have about anything.

Welcome to the McWilliams Academy I'm sure you're going to enjoy the experience, and I'm sure you're going to have a great time on your journey!

With the very best wishes,

Sincerely,

Prof. Sir. Dr. SG. Ndekha

(The Principal).

Why Is Accreditation Important?

Accreditation is a “stamp of approval” - it indicates that an Institute provider measures up to specific standards set by a quality council. This means that, when you study with an accredited Institute provider, you can be sure that you are receiving an education that meets the standards and requirements set by the relevant quality council.

The advantage of the Accreditation

1. They are helping students to determine whether Colleges and other institute providers comply with specific standards.
2. They are assisting employers in assessing the validity of qualifications earned from Colleges and other training providers.
3. They are helping Colleges and other training providers to determine whether credits can be transferred from another Institute.
4. They helped other Colleges and training providers to implement self-assessment programs to make sure that they maintain their standards and retain their accreditation.
